

Acheter-Louer.fr announces the implementation of the staking solution via its subsidiary Sol Treasury Corp : Estimated Annual Yield of 7% APY to Finance Growth

Acheter-Louer.fr (*ALALO – Euronext Growth Paris*) announces the effective launch of its staking program through its subsidiary Sol Treasury Corp, made possible via a strategic partnership with Delubac & Cie, the first French bank to offer crypto services to businesses, and Meria, a cutting edge player in digital asset investment solutions.

This initiative enables Sol Treasury Corp to generate an estimated annual yield of approximately 7% APY (*Annual Percentage Yield*) on its digital assets. Based on current holdings, the program represents a potential of €160,000 in recurring revenue over 12 months.

The goal is clear: continue deploying capital in order to create a stable cash-flow stream, fund the Group's long-term strategic projects, and establish Sol Treasury Corp as a European leader in crypto treasury companies' landscape.

"This staking program is a significant milestone in our roadmap. By securing regular yields while working with top-tier partners, we are consolidating our model and enhancing value for our shareholders," said Victor Humbertot, Member of the Board of directors of Acheter-Louer.fr.

By leveraging Delubac & Cie's regulated banking expertise and Meria's proven technical infrastructure, Sol Treasury Corp positions itself as a structured, transparent, and performance-driven player in the fast-growing digital asset sector.

Acheter-Louer.fr will provide regular updates to the market on the progress of these operations and their performance.
